

This project is funded under the Safer Internet plus programme a multiannual Community Programme on promoting safer use of the Internet and new online Technologies

# FINAL PUBLIC REPORT

Slovak Safer Internet Centre  
2011-2012

## ABOUT THE PROJECT

The philosophy of the project is reflected in our graphic message, which resembles child's hand, as well as the World Wide Web symbol and colours intend to evoke the traffic lights analogy.

The purpose of the project Zodpovedne.sk is to raise awareness of the wide public to behave responsibly when using internet, cell phones and the new communication technologies. SK SIC and its partners have been implemented the project since 2007. The third phase of the project was finished in December 2012, with the focus on empowerment of children when using the new technologies safely. The project is co-financed by the European Union, from the Safer Internet program.

## THE MAIN OBJECTIVES ARE:

- Run national Safer Internet Centre in Slovakia - Zodpovedne.sk
- Raise awareness concerning safer use of the Internet, mobiles and new technologies in general.
- Devise inventive, attention-grabbing and informative tools and awareness campaigns and using the most appropriate media, taking into account best practice and experience in other countries
- Run helpline - Pomoc.sk accessed by 3 channels : nonstop helpline 116 111, email: potrebujem@pomoc.sk and LifeChat
- Run hotline - Stopline.sk in order to manage reports of the illegal content and conduct
- European networking and active cooperation with other national awareness centres, helplines and hotlines

## TARGET GROUPS:

- Children (3 years old, kinder garden, first grade pupils of elementary schools)
- Youth (second grade pupils of the elementary schools, secondary and high schools students)
- Parents (parents, grand parents, foster parents)
- Trainers (teachers, educators, police referents, coaches...)
- Adults and seniors (adults and seniors)
- Organisations (private, public and NGO's sector)

## PROJECT CONSORTIUM CONSISTS OF:

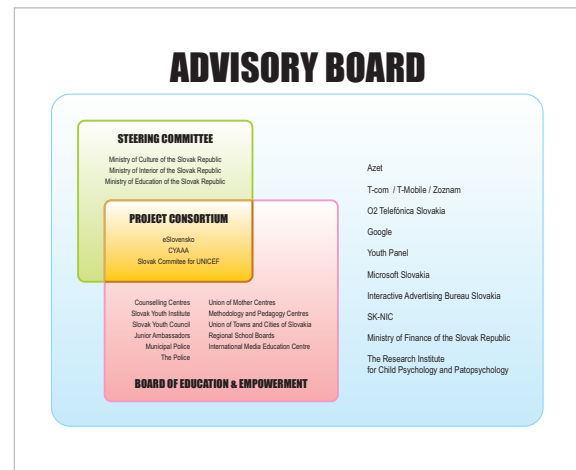

- eSlovensko
- The Slovak Committee for UNICEF
- The Children and Youth Animation Atelier Association

## PROJECT PARTNERS:

## ADVISORY BOARD

Advisory Board (AB) including 27 members acts as main project decision making structure and channel of communication among involved stakeholders active in the field and Slovak Safer Internet Centre (SK SIC). Beside the function of communication and experience / know-how transfer body, AB carries out the role of mutual feedback contribution space, where there all AB's members share own observations within project activities in which they are involved in and also project achievements, goals and impacts reached.

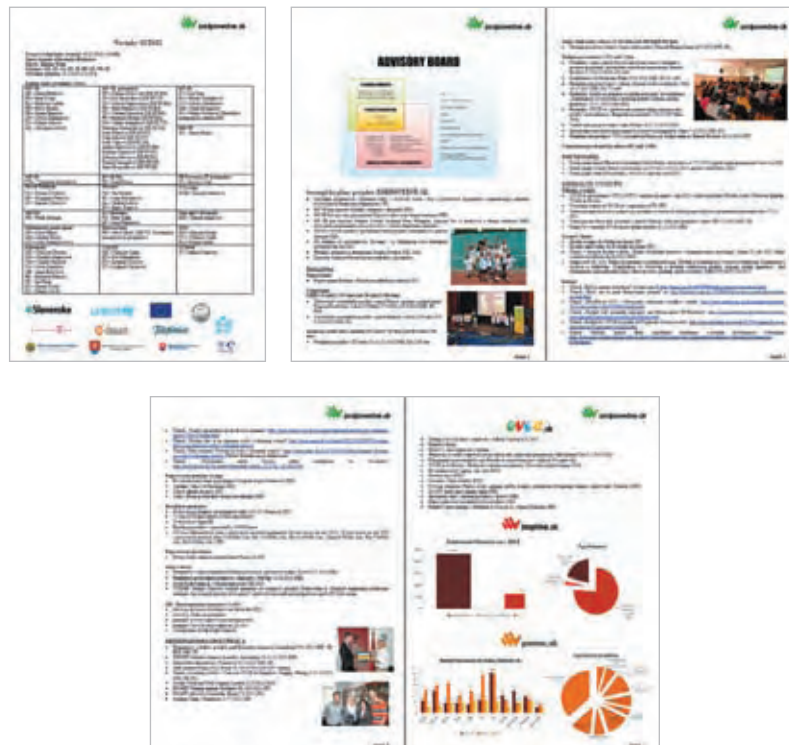

- The most strategic national authorities (Ministry of Culture of the Slovak Republic, Ministry of Interior of the Slovak Republic, Ministry of Education, Science, Research and Sports of the Slovak Republic, Ministry of Finance of the Slovak Republic)
- Internet industry organisation (Azet, Zoznam) and other key industry organisations (Microsoft Slovakia, Interactive Advertising Bureau Slovakia, SK-NIC, Google)
- Major communication service providers and ISP associations (Slovak Telekom, O2 Telefónica Slovakia, Slovanet)
- Significant non-governmental organisations and networks dealing with childcare (The Children and Youth Animation Atelier Association, Slovak Committee for UNICEF, Counselling Centres, Slovak Youth Institute)
- Representatives of university researcher children's use of new media (The Research Institute for Child Psychology and Patopsychology, International Media Education Centre operated by The Department of Media Education of Faculty of Mass Media Communication of University of St. Cyril and Methodius in Trnava)
- Representatives of teachers and parents (Union of Mother Centres, parents involved within Facebook Adults Panel and other teachers/parents)
- Other key NGOs and networks relevant in the field (eSlovensko, Union of Towns and Cities of Slovakia, Methodology and Pedagogy Centres, Slovak Youth Council)
- Government agency and networks, law-enforcement agency (Regional School Boards, Municipal Police, Presidium of Police Force of the Slovak Republic)
- Representatives of Youth Panel and other Youth organisations/networks (Youth Panel and its newly established cooperation platform Facebook Youth Panel, Junior Ambassadors)

During the years 2011 - 2012 the Advisory Board meeting took place for 31 times.

### Monthly newsletter

## YOUTH PANEL (3 REGIONS, 28 MEMBERS)

Regional structure formed as part of the empowerment activities within the country with 3 regions covered - east (Prešov), south (Nové Zámky) and west (Bratislava).

### ACTIVITIES OF THE YOUTH PANEL

YP representative participates regularly at AB meetings with direct influence on the project implementation providing the feedback and opinions from YP in Slovakia

YP representative took part at the Safer Internet Forum in October 2011 in Luxembourg, elected as an EU Youth Ambassador

YP representative took part at the Safer Internet Forum in October 2012 in Brussels

YP president is EU Youth Ambassador

During YP meetings new tools being discussed, feedback collected, trends in using ICT learnt, new ideas for topics for workshops discussed.

- KOLLIPOVCEK** (PDF, 28.7 MB, 116 downloads)

The right sidebar contains sections for 'DÔLEŽITÉ' (Important) and 'OPROČO ZODPOVEDNE.SK' (Why zodpovedne.sk), providing additional information and navigation options.

## TOOLS AVAILABLE ON THE WEBSITE SHEEPLIVE.EU:

Interactive quizzes, complementing Sheeplive, each with 10 multi choice questions for testing purposes, online educative games, wallpapers, comics, colouring book, posters, screensavers, cartoons, jingle, ringtones...

## E-BOOK "CHILDREN IN THE NET"

available in Slovak biggest e-shop Martinus.sk for a free download

## YOUTUBE CHANNEL

## KEY ONLINE TOOLS

### “CHILDREN IN THE NET”

The basic publication on threats on the Internet, their prevention, hints for adults and children, 92 pages, used by teachers as a school book, ‘Bible’ on SI in Slovakia

The e-book is available for free download on websites: Zodpovedne.sk, Sheeplive.eu, Slovak biggest e-shop Martinus.sk

### GUIDE BOOK FOR TEACHERS AND GUIDE BOOK FOR PARENTS

The complementary tool for animated 9 stories Sheeplive, including games and activities

## SHEEPLIVE PROJECT

In 2009 SK SIC launched a new awareness raising tool animated stories Sheeplive/OVCE.sk (from Slovak word 'sheep'), which reflects inappropriate behaviour of youths in the virtual world and shall be utilized as an effective resource for practical media education. As the title of the series may suggest, the stories are set in a sheep pen and the main characters are the little sheep, the wise shepherd, his helper, big bad wolf and the hunter. They combine patterns of Slovak cultural heritage with sensitive up-to-day topics like grooming, racism and xenophobia, misuse of personal information or photographs, which are dealt with in an amusing, yet educational way. The main goal of the creators was to reach even the youngest users of the Internet.

### AWARDS:

Since the beginning of the programme the project has received 11 awards. In 2011 the following:

- 2011 Stuttgart - award the EU City of Excellence 'City of Children' award under the topic 'Media Education'
- 2011 Best Motion Picture at European Prevention Film Festival for project Sheeplive, Székesfehérvár, Hungary.
- 2011 Professional Audience Award at European Prevention Film Festival for project Sheeplive, Székesfehérvár, Hungary.

**THE FOLLOWING 24 EPISODES (3 MINUTES EACH) ARE NOW AVAILABLE:**

1. **Coatless** (Indecent photos)
2. **Don't Dance with the Wolf** (Misuse of photographs)
3. **Secret friend** (Grooming)
4. **White sheep** (Discrimination and racism)
5. **Ninety nine** (Lucky chain letters)
6. **A Belcher** (Past mistakes on internet)
7. **Beauty Crown** (Anorexia on the internet)
8. **Revenge** (Cyber stalking)
9. **Big mouth** (Phishing)
10. **Carnival mask** (Imitation of idols in dangerous scenes)

20. **Mobile mania** (Mobile phone addiction and etiquette of mobile communication)
21. **Out of it** (Computer games addiction)
22. **Photo album** (Profile pictures, internet reputation)
23. **Harassment** (Sexting)
24. **Responsible** (Responsible use of internet)

Dubbing by  
a famous Slovak actor

Core Advisory team for the  
Sheeplive cartoons

The project website ([www.sheeplive.eu](http://www.sheeplive.eu)), apart from the stories, offers visitors a handful of accompanying features, such as games, cartoons, glossary of internet terms, emoticons and many downloadable items. (Colouring book, Comics with text, Comics without text, Quizzes, Wallpapers, Screensavers, Ringtone, Leaflets, Posters, Dictionary, Interactive stories, Research, Jingle)

SK SIC has produced Sheeplive not only in Slovak, but also in Hungarian and Roma languages, which are the languages of the largest national minorities in Slovakia. Further we have produced a version in sign language for deaf persons and a version with audiocommentary for blind audience.

Together, we have produced the cartoons in 23 different world languages as mentioned in the table below.

Totally, we have produced 601 episodes of Sheeplive cartoons within the different versions. This makes the total duration of all the material produced to 30 hours and 3 minutes.

The Sheeplive cartoons are regularly broadcast on Slovak national TV. On the main channels (Jednotka, Dvojka) the cartoons were broadcasted 324 times. Apart, it is spread in many regional and religious TVs in Slovakia (approximate total number of broadcasts 4,000) and also in Czech Republic.

**SHEEPLIVE VERSIONS OVERVIEW:**

# OFFLINE TOOLS

(273 900 COPIES)

## DVDS

11 500 copies with stories Sheeplive and methodological guidebooks, distributed during training and events, presentations via network of municipalities, preventivists, children magazines Maxik, Zvoncek, partners, regional education boards, free licences for copies of DVDs to municipalities

## HANDBOOKS

104 500 copies, distributed via 8 regional education boards and kids magazines

## WORKBOOKS

100 000 copies for primary schools

## PROMOTION MATERIALS

900 T-shirts, 2 000 pens, 1 000 bags, 5000 tattoos, 5 000 school timetable stickers, 4 000 bracelets, leaflets, booklet

## POSTER

40 000 copies to primary and secondary schools for promotion of the helpline Pomoc.sk

## MEDIA

During the period 2011 – 2012 the keywords of projects Sheeplive, Zodpovedne.sk, Pomoc.sk, Stopline.sk and others were in media more than 500 times.

## SHEEPLIVE COMICS

in Children magazine Maxik (800,000 printouts within the project)

## PUBLIC EVENTS

### SAFER INTERNET DAY 2011, 8 FEBRUARY

A big event was organised at a secondary grammar school in Bratislava with 250 guests, such as children, teachers, parents and media. During the event 5 new episodes of Sheeplive were launched, together with the international portal Sheeplive.eu. A popular Slovak actor Jozef Vajda, who dubbed the animated stories, took part at the event, together with Robert Šarina, who interpreted the sign language of Sheeplive. Master in cooking national food – halušky (dumplings) was invited as well. Several ministries, such as the Ministry of Interior of the Slovak Republic, the Ministry of Culture of the Slovak Republic, the Ministry of Education of the Slovak Republic, the Slovak Committee for UNICEF, the Government Council for Crime Prevention and Bratislava Higher Territorial Unit took part. Media coverage were represented by national, regional, religious and private TVs, newspaper, radio and several web sites.

## SAFER INTERNET DAY 2012, 7 FEBRUARY

The key event organized on 7 February 2012. The event took place in a Culture House in Bratislava with 450 guests, mostly school children and their teachers. At the event, the new prevention book “Children in the Net” was launched, together with 4 new episodes of Sheeplive and the award ceremony for the 3rd competition. The actor Jozef Vajda was present, together with senior officials from the Ministry of Interior SR and the Ministry of Culture SR. Media coverage included national, regional, religious and private TVs, newspaper, radio and web sites.

## LET'S READ

On May 31st, 2011 a nationwide activity called "Let's read" was organised. Several libraries and schools throughout the Slovak Republic participated and cooperated in this project. The aim was to motivate children to read books and regularly visit the libraries. The event was attended by 30,480 children. Part of the action was to spread edification regarding awareness of safe behaviour on the Internet. Children were given the contact information on the helpline Pomoc.sk and information about the ongoing project of educational fairy tales Sheeplive.

On May 31st, 2012 was organised a nationwide activity "Let's read" as the 5th year. Thanks to the huge amount of libraries and school across Slovakia involved, the record in the participation was broken. Totally 35,542 children participated in the event. They received the information about the safer internet project, helpline Pomoc.sk and cartoons Sheeplive.

## 21KM FOR CHILDREN

On September 11th, 2011 a charity event "21 km for children" was organised. In this event took part 166 adult runners and 102 children with parents. The active participants were provided with the information materials about project Z odpovedne.sk and Sheeplive. For approx. 300 visitors of the event area was at disposal the poster "Safely on the Internet" and contact information on the helpline Pomoc.sk. At the same time our staff provided parents with the essential information and offered basic counselling on the subject - children and virtual world.

On September 9th, 2012 was organised the 4th year of the charity event "21 km for children". The event was promoted by celebrities. During the venue more than 600 participants were informed about the project Z odpovedne.sk, Sheeplive and helpline Pomoc.sk.

## COMPETITION

The third year of the competition was organised in 2011. The goal was to increase awareness and empower children in safer internet.

Competition on SI was for pupils up to 11 years, students between 12 and 15 years, students over 16 years, prevention officers, schools and municipalities. Children and youth created materials, short films, websites, poems, pictures, theatre performances on prevention on the internet and mobile phone. Adults implemented prevention activities. 20,211 children were involved and the award ceremony organized during SID.

Category	Award	Participants	Project name
Prevention coordinator	The most responsible library	Public library M. Rešetku, Trenčín	Traps around us
Prevention coordinator	The most responsible municipality police	Municipality police Sereď	Closer to citizens
Municipality	The most responsible city	Považská Bystrica	How not to loose a child on internet
School	The most responsible school	ZŠ M. Kukučina, Dolný Kubín	Medium - a wrong demon
School	The most original project	ZŠ M.Sch. Trnavského, Trnava	A goat on Facebook, a theatre play
Children under 11 years	The best website	Tomáš Droba, Juraj Námešný, (ZŠ Jilemnického, Žiar nad Hronom)	Our blog
Children under 11 years	The best animation	Michal Varga (ZŠ Vančurova, Trnava)	Personal data misuse
Children under 11 years	The best presentation	Team of ZŠ Jilemnického, Žiar nad Hronom	Cyberbullying
Children between 12 and 15 years	The best presentation	Jitka Fiřová, (ZŠ Hrnčiarska, Humenné)	Cyberbullying
Children between 12 and 15 years	The best website	Team of ZŠ Gábora Bethlena, Nové Zámky	Website <a href="http://www.ibe.zwebnode.sk">www.ibe.zwebnode.sk</a>
Children between 12 and 15 years	The best animation	Juraj Vasek (ZŠ M. Kukučina, Dolný Kubín)	Miceface
Children between 12 and 15 years	The best video	Lívia Spodniaková, Paulína Nováková, Adam Šimo (ZŠ Jilemnického, Zvolen)	Cyberbullying
Children between 12 and 15 years	The best video	Ľuboš Perniš (Gymnázium Vazovova, Bratislava)	Video
Children between 12 and 15 years	The best literary work	Team of class 8.B, ZŠ Zocha, Jilemnického, Revúca	Poetry - Fejsbúková
Youth over 16 years	The best video	Patrik Levický (Stredná umelecká škola, Levice)	
Youth over 16 years	The best paint	Marek Jalc	Personal data misuse
Youth over 16 years	The best paint	Kristína Havlíková (Soš Cintorínska, Nitra)	Internet acquaintance

The fourth year of the competition was announced at the end of the year 2012. Apart from the previous categories, the participants can compete also in the project proposals. The award ceremony will be organised during the Safer internet day (SID). Till now, we count more than 20,000 participants.

## HELPLINE

Helpline Pomoc.sk is run by the Slovak Committee for Unicef, which is present as a non-governmental organisation in Slovakia since 1994. The helpline was established in 2008.

Helpline has the following tasks:

- Provides information, psychological, social and legal advice
- Creates and uses the communication space for prevention
- Ensures crises prevention in stress situations
- Ensures interdisciplinary and inter institutional co-operation when it is necessary
- It is available across Slovakia and it is aimed at children 0 -18 years old, youth and adults in the interest of children.

### CHANNELS:

Nonstop free telephone  
number 116 111

Online helpline - chat daily at  
[www.pomoc.sk](http://www.pomoc.sk) 4.00 p.m. - 10.00 p.m.

Email advice at  
[potrebujem@pomoc.sk](mailto:potrebujem@pomoc.sk)

## OPERATION OF HELPLINE

Continual work of Helpline Pomoc.sk is provided by the team of 3 permanent employees: Director of Child's Helpline, a professional guarantor and an office and staff co-ordinator

Direct contact with the clients of Pomoc.sk helpline is provided by the team of trained about 40 consultants and 21 supervisors who are experienced in the distant form of communication.

New consultants are trained for distance work and counselling two times a year. Each training takes 92-hours. Particular attention has been paid to the issues of current virtual environment and new technologies

## OVERVIEW TYPE OF QUESTION AT HELPLINE POMOC.SK

## HOTLINE

Launched on 8 February 2010, a public hotline Stopline.sk with the aim to fight mostly the abuse of children on the internet, racism and xenophobia. General public can use the service using the email stopline@stopline.sk or the electronic form. Contract on cooperation with the Ministry of Interior SR was signed in April 2010 and is still valid. Stopline.sk has become the full member of the international association of internet hotlines in April 2012.

Key tasks:

- Operates the hotline service, receives reports from public on illegal content and conduct on the internet
- Operates the hotline Web site www.stopline.sk, incl. online reporting form
- Co-operates with the Police – regular meetings
- Uses new INHOPE reporting system
- Co-operation within INHOPE

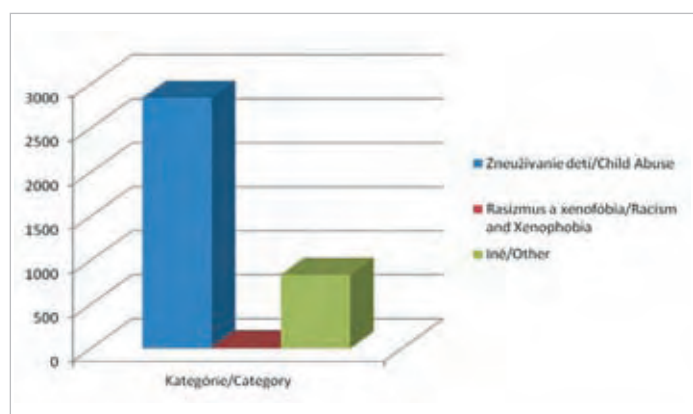

Special award for project Stopline.sk at the international conference ITAPA

As a leader in awareness tools production, SK SIC contributes widely into the INSAFE network with online and offline tools, videos and also the international portal [www.sheeplive.eu](http://www.sheeplive.eu). In total 525 tools are available for the international use, bulk of it represented by Sheeplive cartoons in several languages.

# MEDIATION OF SAFER INTERNET USE

## HOW DO THE ESLOVENSKO'S PROJECTS CONTRIBUTE TO IT?

**The Survey Final Report**

**BRATISLAVA 2012**

With financial support from the EU's multiannual Community Programme „Safer Internet“  
on promoting safer use of the Internet and new online technologies.

## MEDIATION OF SAFER INTERNET USE TO CHILDREN AND THE PROJECT ZODPOVEDNE.SK

Internet has been an integral part of life of still younger and younger children. There are more factors which influence a way of Internet use, levels and types of risks children face to. On the child's side there are following factors: – their age, technical skills, knowledge about safer Internet use, netiquette handling, their personality, school, friends and a wider society. Everything above mentioned influence significantly how their knowledge and skills of Internet use will be developed supported and mediated. The term **Mediation of Safer Internet Use** has not been incorporated into Slovak terminology yet. According to foreign literature it can be defined freely as an addressing safer Internet use to children (Livingstone, Helsper, 2008).

The NGO eSlovensko plays a significant role in mediation of safer Internet use. It implements the project *Zodpovedne.sk* (in English: Responsibly), supported by the European Commission within the "Safer Internet" Community programme. The project provides running the Centre of safer Internet *Zodpovedne.sk*, with the objectives to raise awareness, to maintain educational activities on Internet safety issues towards public, to approach new technologies and to prevent crimes. Both other projects *Pomoc.sk* (in English: Help) and *Stopline.sk*, designed to fight against harmful Internet content, are a part of *Zodpovedne.sk*. The project *Sheeplive.eu* (in Slovak: *OVCE.sk*) was initiated by the NGO eSlovensko as an integral part of *Zodpovedne.sk*, *Pomoc.sk* and *Stopline.sk*. Two main parts of the *Sheeplive.eu* project are children's cartoon series and an international internet portal, both focusing on the youngest users and internet threats prevention. It serves for youth as a mirror of their inappropriate behaviour and it gives adults an opportunity to learn about children's internet world as well. The cartoon series for children explains principles of safer Internet use in a funny and fetching way. The series is supplemented by didactic material for both parents and teachers, which help in effective mediation of the messages. The series has been premiered in public media, is available on DVDs, published on websites and often serves teachers as an auxiliary teaching material in media education.

In order to make the activities of the national awareness node *Zodpovedne.sk* and other eSlovensko's projects more effective, there was implemented a survey, done by an independent researcher, who focuses on Internet opportunities and threats.

### In the survey we were interested in:

- to what level children are aware of meeting risks, feel unpleasantly or helplessly in some Internet situations,
- within what scope they know and use the activities and the projects of the national awareness node *Zodpovedne.sk*, serving as safer Internet use support,
- what mediation tools children perceive as the most useful,
- whether children are able to recognize messages of awareness products (the *Sheeplive* series) and use them in their real Internet behaviour.

The survey was implemented in May and June 2012 and there participated 390 children (180 boys and 210 girls) at the age 9 - 18. They were randomly selected from primary schools (4th, 5th, 6th, 7th grade) and secondary schools (2nd grade) in Bratislava, Sv. Jur, Turcianske Teplice, Zilina, Martin, Sucany and Skalica. With a permission of their parents, children were given anonymous electronic questionnaires, which were being filled up at school's computers by a researcher's presence. Because of a need of using a uniform methodology for all children, there was not possible to include children younger than 9 years old into the survey. The children at their pre-school and younger school age, who are one of the project target groups (mainly of the project *Sheeplive.eu*), have not got their cognitive skills satisfactory mature for assessing of detecting phenomena and expressing them in the survey. Special qualitative research methods and individual approach would be needed for this category, which was not possible to implement within the survey scope.

Regarding the project *Sheeplive.eu* duration (the first episodes of the series were premiered in Slovakia on 8th Oct. 2009), it was useful to ask children aged 9-18 about the project. They had been 6-15 years old in the time of the project implementation. We were interested in a depth and extent of the project impact on this target group.

For outcomes proceeding, the sample was divided to:

- children aged 9-10 (N=111) on average 9.77 years old
- children aged 11-13 (N=157) on average 12 years old
- adolescents aged 15- 18 (N=122) on average 16.49 year olds

## HOW CHILDREN PERCEIVE RISK ON THE INTERNET

Children and adults perceive Internet risk in a different way. We were interested in what level children themselves feel insecure while using Internet. We tried to find out whether they have already been bothered or insulted by someone or something or they did not know how to react properly.

**Table 1: How children perceive Internet risk**

	9-10 years old	11-13 years old	15-18 years old	all children (N=390)
<b>yes</b>	<b>30.6%</b>	<b>26.1%</b>	<b>21.3%</b>	<b>25.9%</b>
yes, sometimes	27.0%	24.8%	20.5%	24.1%
yes, often	3.6%	1.3%	0.8%	1.8%

*Note: Have you ever experienced bothering or insulting on Internet, or that you did not know how to react properly?*

More than a quarter of interviewed children are aware of being in a risky situation sometimes. The younger children, the more often they state having met risks (see the table 1). It could be related to a raising awareness of Internet risks as well as that a lot of activities on the Internet is done by still younger children when they are not able to handle difficult situations (this age shift has been a long-term trend). Children aged 9-10 have got less technical skills and experiences with social situations. They have not got developed their abstract and critical thinking sufficiently yet and are not able to consider consequences of their actions properly, what are significant disadvantages in decision making in ambiguous situations. As researches show, Internet risk exposure increases with age (Livingstone et al., 2012), because children are concerned with a wider range of activities, they experiment with identity etc. Assessing the level of risk was objectified in these studies (number of activities which adults consider as risky). However, in our survey we asked about the situations, which children themselves consider as risky. The level of perceived risk decreases with age because older children possess more experiences and skills to handle situations and thus they do not perceive them as threatening in contrast to their parents.

**Table 2: Helplessness on Internet, experienced by children**

	9-10 years old	11-13 years old	15-18 years old	all children (N=390)
<b>yes</b>	<b>33.3%</b>	<b>28.8%</b>	<b>16%</b>	<b>26.5%</b>
yes, sometimes	29.7%	28.2%	15.1%	24.9%
yes, often	3.6%	0.6%	0.9%	1.6%

*Note: We can experience various things on Internet when we are not sure how to go about it (e.g. someone bothers us all the time). We would rather to consult with somebody on it. Have you ever experienced such a feeling?*

Even though children themselves can realize that they face a difficult situation, yet it does not have to mean that were not able to handle it. We asked them about experienced helplessness in a risky situation. More than a quarter (and even every third small child) of children had a feeling that they did not know what to do and they would have rather consulted with somebody on it (see the table 2).

**Chart 1: Risk and helplessness perceiving in Internet situations**

*Note: Perceived risk on Internet – Have you ever experienced that something on Internet bothered you or you didn't know how to react properly? Perceived helplessness on the Internet – On the Internet there sometimes happen some things, when we are not sure how to go about it (e.g. somebody bother us all the time). We rather consult with somebody on it. Have you ever had such a feeling?*

Adolescents face more difficult situations more often however they feel helpless less often. For younger children is it rather the opposite. In comparison with being aware of risks they feel more often they would need a help how to react properly on the Internet. These results confirm a high relevance of support in this area, mainly from the side of competent parents and teachers who stay close by children. The support should go to helplines as well, which should be reached easily by children.

A quarter of children state that they know where and how they can get an advice from Internet safety experts when they feel helpless. *(There are people, whose job is to advise others how to handle unpleasant issues we can experience on the Internet; e.g. if somebody bothers you on the Internet. Do you know how and where you can get an advice from these people?).* The knowledge about the accessible professional advice declines with age (27% 9-10 years old, 26% 11-13 years old, 22% 15-years old). This feeling is subjective and it could be overestimated at small children, mainly when we consider their free answers in which they state parents, teachers and computer sellers as experts, being able to help them in a case of problems. This result could be influenced by targeted prevention, focused on younger school children, which increases their feeling of being informed but a real awareness as well. Actually, only 7.7 % of children and majority of 11-13 years old (every tenth child) asked experts for a help, when they were helpless.

Additionally, we wanted the children to describe what from their environment have been useful in adopting safe Internet behaviour. For an open question *From where will you get to know how to behave on the Internet not to experience bad things? Write down everything what comes to your head.* the most often all children replied „parents, family (a brother, a cousin, a sister...), school,

teachers, friends, siblings, Google, webpage, forums, magazines". In the answers, the family and the school were mostly at the first places. Adolescents often answered „I rely on my own mind“ or „I pay attention by myself“, what expresses their inner responsibility for safe Internet behaviour and their higher competences and skills.

## WHAT WEBPAGES ABOUT SAFER INTERNET DO CHILDREN KNOW?

Before any of eSlovensko's projects was mentioned, 24.2% of children had stated that they knew a webpage on good behaviour on Internet. Perceived awareness decreases with age. It is possible that the children only assess their awareness more realistically.

**Chart 2: Do children know a webpage on safer Internet use?**

*Note: Do you know a webpage about how to behave on Internet properly not to experience anything bad?*

When the children were asked in an open question to name what webpage, we could identify 57 answers as valid. Out of this number in 73.7% (42 answers) the answer was the webpage of the eSlovensko project (Zodpovedne.sk, Sheeplive.eu, Pomoc.sk). Almost a quarter of children visited a webpage on safer Internet use (approximately as many as they know a webpage). They might remember it just because they have visited it.

**Table 3: What webpages on safer Internet use children know (without prior mentioning eSlovensko's products)**

Identified source of information about the Internet safety	Number of answers among children	Percentage regarding all identified answers
eSlovensko's projects (Sheeplive.eu, Zodpovedne.sk, Pomoc.sk)	42	73.70 %
Sheeplive.eu	23	
Zodpovedne.sk	18	
Pomoc.sk	1	
Bezpecnainetnete.sk	8	14.00%
Školahrou.sk	1	1.75%
Searching information on portals (Google, Wikipedia, Zoznam)	5	8.80%
Microsoft	1	1.75%
total	57	100%

*Note: What webpage do you know about how to behave on Internet properly not to experience anything bad? Open question.*

Chart 3: What webpages on safer Internet use children know (without prior mentioning eSlovensko's products)

Note: What webpage do you know about how to behave on Internet properly not to experience anything bad? Open question.

## WHAT STORIES ON SAFE INTERNET DO CHILDREN KNOW?

Similarly before prior mentioning the eSlovensko's projects, we had asked children whether they knew some tales or stories on safe Internet behaviour. The 42.5% of all children and almost a half of youngest children (48.5%) responded positively. When asking about particular stories titles there were identified 113 valid responses, out of this number **78% were the Sheeplive stories** and 1.18% the interactive stories within the project Zodpovedne.sk. Another 4.4% replies were some other tales (for example Macko Webko, the tales on [www.bezpecnenainternete.sk](http://www.bezpecnenainternete.sk)). 9.7% of the children mentioned a message or a story, out of which was not possible to identify a particular tale (for example about *hackers*, *viruses*, *Facebook*, *about protecting privacy*). A part of the children responded they had already seen such a story but were not able to recall its title.

It is far more difficult to name something by heard without prompting. Nowadays people rather search information than remember it and this can contribute to this state too. We were interested whether children can recognize the particular projects and how they use them.

## INFORMEDNESS AND VISIT RATE OF THE PARTICULAR ESLOVENSKO'S PRODUCTS

### DO CHILDREN KNOW THE PROJECT ZODPOVEDNE.SK?

We asked them directly whether they know the webpage of the national awareness node [Zodpovedne.sk](http://Zodpovedne.sk).

Chart 4: Do you know the webpage [Zodpovedne.sk](http://Zodpovedne.sk)?

Note: Do you know the webpage [Zodpovedne.sk](http://Zodpovedne.sk)? – Yes, I know. - Yes, I have already been there.

More than a third (38.2%) of all asked children knows the webpage [Zodpovedne.sk](http://Zodpovedne.sk), the majority is among 11-13 years old. The rate of visits declines with age. Just in a group of the youngest children there were the most of those, who have visited the webpage (22.5%). It can be considered as a success of the project, since the group aged 9-10 is the most endangered by Internet risks in comparison with older children.

Out of 82 identified free answers for the question where do children know the webpage [Zodpovedne.sk](http://Zodpovedne.sk) from, there were 65% responses „*from the school*“ (from lessons, lectures, IT, from teachers), 8.5% answers stated “from friends”, 4.9% answers “from parents”. Among the rest of the answers there were mentioned TV and radio, magazines, siblings, schoolmates, when searching some other information on the Internet, through [Sheeplive.eu](http://Sheeplive.eu) (2.4%-3.2%).

These findings prove that for the first time children encounter products of the [Zodpovedne.sk](http://Zodpovedne.sk) project through schools, which use them as a mediation tool – in media education, which is a compulsory part of primary and secondary curriculum. Schools can choose a teaching form – either as an individual optional subject, or as a part of other subjects (IT, Slovak language and literature, civic education, ethics) or as a hobby group or a project. From a nation-wide survey on media education at secondary schools (Kacinová, Kolcakova, 2012) follows that media education is most often implemented through inclusion the content into other subjects, mostly into IT, as well as it follows from our responders.

We wanted to know whether there had been a parent present by the children when they had been browsing the webpage [Zodpovedne.sk](http://Zodpovedne.sk). Parents play an important role in mediating useful information. The children, who have visited the webpage

Zodpovedne.sk at least once (N=127), have browsed it mostly with teachers (45.7%). 21.3% of the children have browsed it together with their parents, 11.8% together with other adults, 20.5% with peers. Even 35.4% of the children have browsed the webpage on their own. As stated in the free answers, it is so thanks to the Sheeplive stories, which are available for free on the webpage.

**Chart 5: Who have children browsed the webpage Zodpovedne.sk with?**

*Note: Who have you browsed the webpage Zodpovedne.sk with? Multiple choice. N=127 (9-18 years old) – the children, who have visited the webpage Zodpovedne.sk at least once.*

## DO CHILDREN KNOW THE PROJECT SHEEPLIVE.EU?

The survey results prove a high recognition and visitor's rate of the Sheeplive stories. Out of all the children (9-18 years old) 65.6% know the stories and 55.8% have watched them. Their prevalence among children is significantly related to age – the younger are children, the more of them know Sheeplive and also watch them.

**Table 4: Do you know the stories from the Sheeplive cartoon series?**

	9 years old	9-10 years old	11-13 years old	15-18 years old	all children (N=390)
<b>yes, I know</b>	92%	88.3%	60.9%	50.8%	65.6%
Yes, I know and have watched them	88.0	82.0	48.1	41.8	55.8
Yes, I know, but I haven't watched them	4.0	6.3	12.8	9.0	9.8

The series is the most successful for the youngest, who were also the series' target group. 88.3% 9-10 years olds know the series and 82% have watched at least one of them. Almost every 9 years old child (92%) knows the Sheeplive cartoon series and 88% have watched at least one episode. In this age group there is also the smallest difference in numbers of those, who know the series and those, who also watch them. In this sense the project can be consider successful.

**Chart 6: Do you know the Sheeplive cartoon series?**

Note: Do you know the Sheeplive cartoon series? – Yes, I know. – Yes, I have watched at least one episode.

The children, who have watched as least one episode of Sheeplive (N=217), have seen it mostly on TV, Youtube, and during school lessons. Almost half of the children have reached the series from the webpage Zodpovedne.sk, or vice versa – they have reached the webpage from the webpage Sheeplive.eu.

**Table 5: Where children watch the Sheeplive series**

Total (N=217) - Those who have watched them	On TV	on DVD	on YouTube	during school lessons	On a screen in a bus	on webpages
Where have you watched the stories	61.8%	11.1%	59%	53.5%	2.3%	48.4%

Note: Where everywhere have you watched the Sheeplive cartoon series? Cross out as many as you need. Multiple choice.

## DO CHILDREN RECALL THE MESSAGES FROM THE SHEEPLIVE SERIES WHEN IT IS NEEDED? YES!

### HAVE YOU RECALLED SOMETIMES DURING A DAY WHAT THE SHEEP FROM SHEEPLIVE WERE DOING AND EXPERIENCING?

Almost a third (31%) of all the children who have watched stories on Sheeplive at least once (N=217), have recalled something from the series during a day. Only 4.2% of the children state that they have experienced the similar situation as the sheep; more than a quarter (27.3%) is not sure about it. It does not have to be caused by an inability to recognize similarities between situations, actually, it can well be that the children having watched the stories could not have faced these situations yet. In this case the aim of prevention would be fulfilled as the prevention should be mediating children before they meet a particular risk to be able to react adequately.

### WHEN DO YOU RECALL THE SHEEP?

Children recall the sheep in the context of their everyday experiences, what means that **motifs and themes of the stories were incorporated into their everyday reality**. Children like them, the sheep are parts of their discussions, they have got **into their subconsciousness, have become a part of their culture**. The trigger is often **analogical context of their everyday life** - friends, disco, environment.

- *When I am bored.* B, 12
- *When I am going to sleep.* G, 9
- *Every day.* B, 10
- *I have told my mum when having breakfast.* B, 12
- *When we are discussing it with friends.* B, 10
- *When I am at a sheepfold.* B, 9
- *When I am outside with my fellas.* G, 12
- *When somebody was mentioning a disco, I recalled the dancing sheep.* G, 16
- *At lessons and after school.* G, 10

The children recall the stories mainly in connection with their **activities on the Internet**.

- *When I am on the Internet.* B, 11
- *During IT.* B, 10
- *When I am playing a computer.* B, 12

**Most often the children recalled the Sheeplive stories in connection with realizing the risk** they were facing. The children also recalled the stories **before it could have happened them something** – when they recognized difficulties or unclearness of the situation (a possible threat). They assessed a given situation as difficult when it was worth thinking how to behave. The increased sensitivity of children to the risky situation is one of the fulfilled objectives of the national awareness node, a significant prevention element.

- *When there is a possibility to get into a more dangerous situation.* G, 16
- *When I have a problem or I shall decide to do something bad or not etc.* G, 12
- *When I am signing up somewhere.* G, 10
- *When I shall do something difficult on the Internet.* G, 10

Children are more sensitive not only to difficult situations on the Internet, but **they recall the messages in a situation, when they experience it by themselves, or when they recognize it in other's people behaviour on the Internet**. It could be considered as another successful effect of Sheeplive stories and a significant prevention tool.

- *When I am doing something what was good on Sheeplive.* B, 10
- *When I was taking a picture of myself :D* G, 10
- *When something similar happens.* G, 10
- *When a stranger bothers my friend e.g. on Facebook.* G, 12
- *When I am watching obscene videos.* B, 9
- *When I am watching almost naked girls on Facebook.* G, 17
- *Yes, but I'm not commenting on it, I find it too obscene.* B, 17
- *When my friend chatted me to send him a photo in my underwear.* G, 13

Music, animation and humour contribute to a good recollection of the stories.

- *When I am pretty bored. I like the animation.* B, 16
- *A voice of Jozef Vajda.* G, 15
- *They are so lovely. It is drawn nicely.* G, 11
- *Those characters, are witty, it is great J.* B, 13

## DO CHILDREN KNOW WHAT THE SHEEPLIVE STORIES ARE ABOUT?

When asking *What are the Sheeplive stories about?*, there was almost in all answers indicated **understanding or their educational nature** („they are instructive tales“). Children understand or interpret it at various levels:

### a) ... how we have to/must not behave on the Internet.

- *How we have to behave on the Internet and that we have to be careful what we do.*
- *What we should not do on the Internet.*
- *How to use the Internet safely.*

### b) ...what risks are on the Internet and how to avoid them. It is significant that they have noticed that describing risks serves for prevention, for avoiding the risks

- *About what unpleasant could happen and how to avoid it.* G, 12
- *Something like a fable what to be careful about on the Internet.* B, 9
- *About behaviour on the Internet, about various dangers and how we can avoid them.* B, 15
- *It says in a funny way what we can experience on the Internet if we are not careful.* G, 13
- *In this tale there are situations from a real life which you can also experience and how to behave in such situations.* G, 12

### c) Apart from noticing general educational character, children stated very concrete messages.

- *Not to misuse photos and video.* B, 10
- *We should not tell strangers where we live.* B, 10
- *We must never send our pictures or data to other people through the Internet and we mustn't meet anybody unless an adult knows about it.* G, 12
- *Prevention against effect of the Internet, about an impending danger, date misuse and how to prevent it.* B, 12
- *How to behave on the Internet not to make fools of ourselves or not to allow somebody threatens us through the Internet.* B, 10
- *It teaches us not to believe everything.* G, 10
- *About passwords and about what not to put on the net and how not to be deceived.* G, 14
- *How to use the Internet in a right and safe way, not to show our personal data to all but only those I trust.* G, 15

**d) Some children can extent an educational and good examples area to overall human behaviour and ethical principles.**

- *I don't know, it is about behaviour on the Internet and not only on the Internet....actually everywhere, not to misuse personal data of others or not to threaten anybody... I think it is worth seeing it. Firstly, because it is funny and thus interesting and secondly, because it is truthful and also educational :-). B, 12*
- *In this tale there are situations from a real life which you can experience as well and how to behave in such situations. G, 12*

**Children understand symbolism of the characters** (sheep, a wolf, a shepherd, Johnny). The most significant is the recognition of the sheep as children or common people.

- *About safe browsing and behaviour on the Internet. Common people are the sheep, the shepherd gives them an advice B, 11*
- *About what not to do on the Internet like the sheep. G, 10*
- *About a real human life. G, 12*
- *There are various lessons how to behave safely on the Internet. It is shown on the sheep. B, 16*

## WHAT BASED ON SHEEPLIVE STORIES WOULD CHILDREN PASS ON TO YOUNGER CHILDREN?

Children would pass on to younger children mainly actual messages, which they considered the most important. Even the youngest children from our survey were able to interpret **concrete messages** from Sheeplive stories and formulate them into a comprehensible message for younger children:

- *If they put their personal data on a computer, they could be robbed or put down. B, 10*
- *That we shouldn't publish our own photos on the Internet, that we shouldn't believe Internet's instructions for something. B, 11*
- *We should not put on the Internet embarrassing video or pictures; we should not make friends with strangers etc.. B, 10*
- *How to behave in the situation when a stranger is bothering you and wants to meet you, tell your parents! B, 11*
- *Be careful about who you are writing with and if you don't know him, don't meet him, even he would beg you. Do not go there! G, 12*
- *Children, you can't put your pictures on the Internet which you don't want others to see them. Later on they can misuse them! B, 15*
- *Not to add friends on Facebook, who they don't know. G, 13*
- *Do not publish your personal information without thinking about their impact on the future. G, 17*

They also have sent a motivating message to younger children that **they can learn a lot from the stories, so it is worth watching them.**

- *There are some nice videos on the webpage Sheeplive.eu, where you can learn a lot of lessons for your life and you should watch it to avoid troubles. G, 10*
- *There you can learn a lot what you should and should not to do on the Internet. G, 10*
- *There are some situations from a real life in this story, you can experience as well and how you should behave in such situations.*

G, 12

## DO CHILDREN KNOW AND USE OTHER ESLOVENSKO'S PROJECTS?

### POMOC.SK

The Helpline Pomoc.sk is a part of the project Zdpovedne.sk, supported by European Commission within the Safer Internet programme. Its objective is to provide a coordinated help and counselling for responsible use of the Internet, mobile communication and new technologies. The helpline Pomoc.sk has been established by association of Children Safety Line and the Helpline of the Zdpovedne.sk project. The project results show that 12.18 % of children know it. This information very probably depends on delivered mediation (mainly at school). It is known mostly among 11-13 years olds – almost every fifth child. In spite of being used by further fewer children, is good to know that they know where to ask for an advice in a case of need.

**Table 6: Do you know the webpage Pomoc.sk?**

	9-10 years old	11-13 years old	15-18 years old	all children (N=390)
<b>yes, I know</b>	<b>9.9%</b>	<b>19.1%</b>	<b>7.4%</b>	<b>12.8%</b>
yes, but I haven't visited it yet	7.2%	15.3%	7.4%	10.5%
yes, I have already visited it	2.7%	3.8%	0%	2.3%

The project Pomoc.sk provides nonstop help on phone at the number 116 111, LIVECHAT online - a chat with an operator from 16:00 till 22:00 and counselling via e-mail [potrebujem@pomoc.sk](mailto:potrebujem@pomoc.sk). We asked children if they have known and used some of these sources of help. Majority of the children (19.5%) knows the helpline, however the most children have used help via e-mail. It could be more difficult for children to describe their troubles in a direct contact with adults (a phone line) so that they appreciate more asynchrony in e-mail communication, which enables them to formulate their thoughts in peace. If it is going about something very sensitive, they feel less ashamed and embarrassed. 11-13 years olds were most informed about all three kinds of help that can be related to the fact that school consider this age as the most suitable for mediating this information.

**Table 7: Do you know a free phone line 116 111? ?**

		9-10 years old	11-13 years old	15-18 years old	all children (N=390)
116 111	<b>yes, I know</b>	<b>11.7%</b>	<b>26.4%</b>	<b>16.4%</b>	<b>19.5%</b>

*Note: When something bothers you on the Internet, there are more places where to get an advice. Do you know a free phone line 116 111? Do you know an online chat with an expert on Internet problems? Do you know an e-mail address [potrebujem@pomoc.sk](mailto:potrebujem@pomoc.sk)?*

## STOPLINE.SK

A national centre for reporting illegal content on the Internet Stopleveline.sk fights against child abuse online (child pornography, sexual exploitation, child prostitution, child trafficking, grooming etc.), against racism and xenophobia and other content or actions which show signs of crime. Through this project Slovakia has joined the international network INHOPE – a network of national nodes and organisations for safety of information technologies.

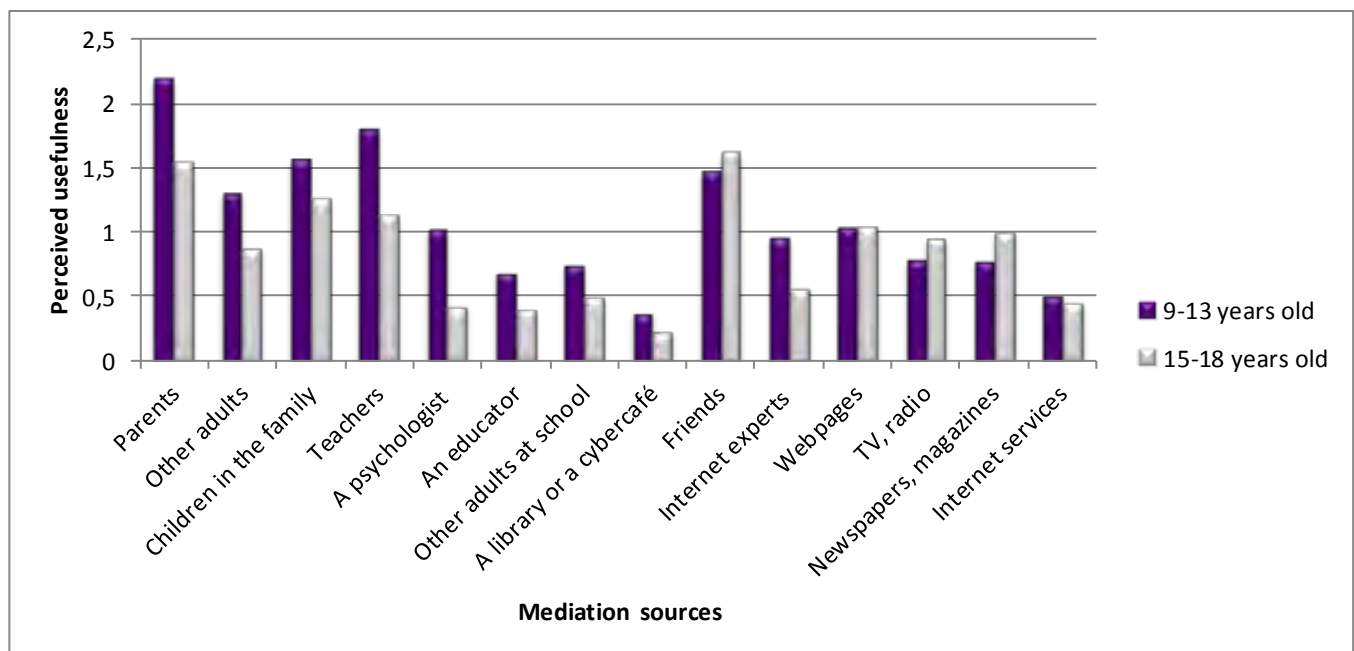

**Table 8: Do you know the webpage Stopline.sk?**

	9-10 years old	11-13 years old	15-18 years old	all children (N=390)
yes, I know	3.6%	7.0%	3.3%	4.8%
yes, but I haven't visited it yet	2.7%	5.7%	2.5%	3.8%
yes, I've already visited it	.9%	1.3%	0.8%	1.0%

Almost 5% of children know Stopline.sk and out of them 3.8% even surprisingly state that they have already reported an illegal content through this webpage. 11-13 years olds were the most informed.

## WHAT IS THE MOST USEFUL FOR SAFE INTERNET USE BY CHILDREN?

**Chart 7: Perceived usefulness in safe Internet use (by younger children and adolescents)**

Note: Try to judge, who was the most useful in your safe Internet use? The graph shows average coefficient of usefulness for children (a range of coefficients 0-3).

Parental mediation is the most useful source of information on safe Internet use for younger children (9-13 years old), followed by school mediation (teachers), the project Sheeplive.eu and then peers (children in a family and friends). Afterwards there are stated webpages, a psychologist and Internet professionals.

Simultaneously the projects Z odpovedne.sk and Sheeplive.eu are used in mediation – 65% of children got to know about the project at school, at lessons. If children name a school as useful, it includes the tools, which the school uses in mediation. It influences content and a form, in which information is at school mediated and thus perceived useful. If children state as a useful tool Sheeplive.eu at the third place apart from school mediation, then it shows that these stories are perceived by children as a very strong source of learning.

Adolescents (15-18 years old) consider peers as the most useful source, followed by parents, children from families and then teachers. It is related to their actual level of skills, which at this age often overcomes their parents' level of skills. A developmental period, during which they are starting to rely on themselves rather than parents and getting help from friends, also plays a role.

Television and radio, as well as magazines and newspapers have decreased in usefulness of safe Internet use mainly among younger children. The Internet (webpages) has started to dominate. Adolescents consider Internet as the most useful media as well, followed by press. A library or a cybercafé are considered as the less useful sources, what relates to dissemination of the Internet (in households, mobile phones, notebooks).

## CONCLUSION

The survey shows that children themselves perceive that just in a real life, on the Internet as well, they sometimes experience a difficult situation, which could be identified as a risk. Younger children more often report risks experiencing as well as helplessness in such a situation, but they use a possibility to ask more experienced whose help they appreciate. For them there are parents, teachers and those who know the issues rather than experts on safe Internet use. This confirms the relevance of education of parents and teachers. Older children do not feel so often put at risk, what is related to advancing their skills, experience and a coping ability. They feel less often helpless and if they need, they consult mostly with peers. They consider a school and parents as the most important source of learning how to use the Internet safely.

Project [Zodpovedne.sk](http://Zodpovedne.sk) plays a specific role mainly in school mediation - children have known the project, the awareness webpage and stories, often during lessons at school. They returned to the webpage [Zodpovedne.sk](http://Zodpovedne.sk) and mostly to [Sheeplive.eu](http://Sheeplive.eu) also by themselves, in their free time, with friends, through various media channels. Without prior mentioning the projects, [Sheeplive.eu](http://Sheeplive.eu), [Zodpovedne.sk](http://Zodpovedne.sk) and [Pomoc.sk](http://Pomoc.sk) formed three quarters of answers to the question what webpage on safe Internet use children know. Many have known or remembered the webpage [Zodpovedne.sk](http://Zodpovedne.sk) through the stories, which are very popular among children. Although the target group of the stories are the youngest children at preschool and younger school age, they are well known also among adolescents, who discuss them with their friends.

The [Sheeplive](http://Sheeplive.eu) stories hit the main target group explicitly successfully – almost all 9-10 years olds know them and the majority has watched at least one episode. We assess as a success not only a number of children, but also a depth, in which messages of the stories permeated to life of children. After parents and teachers, they are the most useful source of information on safe Internet use for young children. The processing, which has been tailored to children, allowed them to love the stories and incorporate them into their everyday life, discussions with friends and thoughts.

The most important is that children can recognize messages from the stories without any problems. They can recall them in the situations in which they can use them. They understand that the sheep play human beings and they have learned from the sheep what they should do and should not do on the Internet. Even children themselves suggest other children to watch the stories because they are funny and can teach them a lot.

***„There are some nice video on the webpage [Sheeplive.eu](http://Sheeplive.eu), where children can find a lot of important lessons for their life and they should watch it to avoid some unpleasant situations. “ G,10***
